

Louisville, KY, USA – March 13, 2018. Electronic Design & Research Inc. announced today of achieving a registered trademark on its logo from the United States Patent and Trademark Office.

United States Patent and Trademark Office issued Reg. No. 5,422,845 to Shvartsman, Vladimir A., 7331 Intermodal Drive, Louisville KY 40258, the manufacture of solid-state electronic modules, namely, AC/DC solid-state (SPST, SPDT, DPST, and DPDT) relays, full bridge drivers for pulse width modulation (PWM) power control, high power solid state switches, piezo drivers, video switches, high pass filters, II-shape band pass filters, input security modules, fog-bulb relays, I+V biases generators for MRI/MRS recordings, neural-based processor for recording Bundle HIS cardiac signal on a beat-by-beat basis from body surface, frequency to voltage converters, soft landing solenoid drivers, comb notch filters, DC-DC converters, 3-phase pseudo-resonance AC drivers, precision pulse width discriminators, high voltage nano-second rise/fall time push pull drivers, etc.

The trademark, registration number 5422845, protects the EDR's logo that was unveiled in 1999 as a part of its branding of various innovated products. Paired with the company's multiple patents the trademark offers an additional protection of EDR Inc. / Vsholding LLC brand and market position.
